

CQube machine pre-install pack

CQube

Thank you for selecting the CQube from the Crem Coffee Queen range of high quality freshbrew machines.

To ensure that your new machine will give you years of trouble free service, then please take the time to ensure that all of the requirements within this information pack are followed and that the pre-installation check list is completed and returned to us.

CQube is a completely new generation of coffee machines. The machines are built around a new technological platform with a unique modular system. Because of the modular system, the flexibility is considerable. The idea behind the CQube is that you start with the basic model and then add on the options you want. In this way, you end up with a coffee machine suitable for your environment, conditions and wishes. CQube Large has containers for ingredients with a capacity of 350 cups per filling.

Features

- Automatic water filling
