

COFFEE QUEEN ORIGINAL

CATER

Cater is a fast, flexible brewer which brews straight into an elegant 2.5 litre serving station (thermos) with tap and level indicator tube. Two variants of the machine are available, with a single or double brewer. With a brewing time of only 5.5 minutes, the coffee is ready in an instant! Since no external heat is supplied, the coffee retains its excellent taste and aroma for a long time.

Cater also makes coffee serving easy and flexible. The serving station fits into all possible environments, and it is easy to handle. Lift the serving station off the brewer and put it wherever you want to serve the coffee. You can also specially design display covers for the serving stations, for easy indication of the coffee that is served. Simple and really neat!

The brewer has automatic water filling, full and half brewing function, built-in tank and a tea water tap on the front of the machine. One serving station is included with a Single Cater and two serving stations are included with a Cater. A water connection hose is included with both versions.

FACTS

SINGLE CATER

- Automatic water filling
- Tea water outlet

MEGA GOLD

Coffee Queen Mega Gold brews straight into an elegant 2.5 litre serving station (thermos) with tap and level indicator tube. Since no external heat is supplied, the coffee retains its excellent taste and aroma for a long time.

The serving station fits into all possible environments, and is quick and easy to handle. Lift the serving station off the brewer and put it wherever you want to serve the coffee. You can also specially design display covers for the serving stations, for easy indication of the coffee that is served. Simple and really neat!

Mega Gold is available with both manual and automatic water filling. The automatic brewers with a water supply have electronic timers and a signal when the coffee is ready. The brewing volume, 4-17 cups, is easy to adjust from the front of the machine.

A 2.5 litre serving station is included with both models. Coffee brewers with automatic water refilling are provided with a connection hose for the water.
