

# GRINDER ORIGINAL

## GRINDER ORIGINAL

This is an elegant, quiet grinder that grinds the fresh beans directly down into a cafetiere or filter holder. The grinder has a clear display on the front, where you can easily select the number of cups to be ground. There is an adjuster on the front, making it easy to set the coarseness of the coffee grind.

Cafetiere sizes up to 8 inch are fully catered for with full digital selection from the front of the machine via a user friendly display. And when your not filling cafetieres the auto-adjust filter pan holder will accommodate most filter systems for fresh ground fresh brew coffee.

The styling of the grinder harmonizes perfectly with our Original Line, which makes it easy to fit into both existing and new environments. Grinder Original suits all our 1.8 litre brewers, CQ Cater, CQ Mega Gold and CQThermos.
