Title: EXPOBAR Line and FMU Flowmeter Change by Supplier

Affected parts, no longer available:

- PN 20010075 – Flowmeter Cover
- PN C60100045 – Flowmeter UL/NetW. Brass FET+LED

New parts added:

- PN C60100045 – Flowmeter UL/NetW. Brass FET+LED (same PN, only updated revision number per changes from supplier)

Affected machines:

- Carat
- Markus
- Monroc
- Office
- Zircon
- Megacrem
- Onyx
- Rosetta
- G-10
- New Elegance
- FMU

Implemented in Spain from: SN 01808472

Implemented in China from: SN pending (running change, not yet implemented)

Change description: The supplier of this core component has slightly modified their design to change the top cover of the standard flowmeter used across the entire Expobar line and in the FMU variants. The change is in material and shape, from brass to plastic, and after testing no functional differences are found. The only other issue that is created is that the plastic protection cover will not snap onto the new plastic top cover, however this is not a safety issue, so the plastic protection covers will be deleted from the machines.

Maintenance: None.

Products in the field: No change.

Backward compatibility: This part is fully backward compatible for all machines.

Spare parts information: The new flowmeter is now the standard component and will be available as spare.
