CQube

CQube is a completely new generation of coffee machines. The machines are built around a new technological platform with a unique modular system. Because of the modular system, the flexibility is considerable. The CQube comes ready for the concepts and innovations of the future. The design and the minimal environmental impact are other distinguishing features of the CQube. The idea behind the CQube is that you start with the basic model and then add on the options you want. In this way, you end up with a coffee machine suitable for your environment, conditions and wishes. The elegant design means that the machine fits in any surrounding. Choose between a white or a black machine and perhaps add corporate branding.

Then, there is the question of size. CQube Large has containers for ingredients with a capacity of circa 350 cups per filling. The Medium model can produce circa 200 cups per filling. Pick the table top model if you want to place your CQube on a shelf or similar. You need to add the base cabinet if you want to place the CQube freestanding on the floor. Then, you continue adding features and options. The CQube is a unique coffee machine already in its basic version. A large number of different types of coffee can be complemented by cold, still or sparkling water. An impressive, precise brewing temperature, brewing time and grinding fineness creates an optimal coffee drinking experience. Maintenance and service is very easy to perform, thanks to the modular system and the design of the machine.

MOCCA & MOCCA BEAN TO BREW

Comes in two variants. A Bean to Brew machine with a large canister for whole coffee beans and a built-in quality grinder. Mocca also comes as a fresh coffee brewer for ground coffee. Both are fully automatic, feature adjustable coffee strength, automatic water refill and brewing mechanism with permanent filter. During the autumn of 2010, Mocca is replaced by CQube Small.

Base cabinet	Model	Width mm	Depth mm	Height mm
	Mocca	265	480	840
	Mocca Bean to Brew	265	480	840

Basic facts	Model	Ingredient canister	Cold water	Capacity approx.
	Mocca	1 canister	–	150 cups/refill
	Mocca Bean to Brew	1 canister	–	200 cups/refill

Basic facts	Model	Power supply	Water connection	Width mm	Depth mm	Height mm
	Mocca	230V1N/2250V	Cold water 1/2" R	265	535	675
	Mocca Bean to Brew	230V1N/2250V	Cold water 1/2" R	265	535	790

What's in it for you?

COFFEE QUEEN FRESHBREW

markant.se

WITH A PASSION FOR COFFEE

Crem International has two very strong brands – Coffee Queen and Expobar. Under the brand Coffee Queen, we have brought together all our machines for freshly brewed and instant coffee, water and juice. Under the brand Expobar, we offer our top-quality espresso machines. All our machines are made by skilful and experienced staff at our own factories in Sweden, Spain and China. With these two brands, we offer the widest range on the market and can satisfy all needs and wishes.

A strong brand of Crem International
